Pasteur4OA Final Conference, 17 May 2016, Amsterdam (post conference revised version)

# OA and EC Framework Programmes

# A few thoughts

## Open Access to scientific publications

- Both Green and/or Gold
- Gold OA: post-grant issues, APC ceiling, hybrid journals...
- Green OA: repositories, embargoes

## Open Research Data

- It could have helped to rather name it 'DMP Pilot'
- Need to state that not everything must be open

## Common issues

- Explanation is paramount
- Money is key: both a bad *and* a good excuse
- Tools and support are needed (importance of projects)
- Importance of feedback for co-shaping European policy
- Overall aim: kick-starting a virtuous circle and change of culture

# Next steps

## The Framework Programmes

- Monitor OA in FP7 and Horizon 2020
- Provide 360° support
  - More training and guidance e.g. on Data Management Plan
- Adapt OA mandates of Horizon 2020 – or not

## Working together

- Get more knowledge on open research data
- Mainstream Open Access and reach towards harmonised policies and common standards on a global scale
- Develop more and better interactions with stakeholders
- *And much more...*
